A STORAGE AND DISTRIBUTION SYSTEM POWERED BY DETERGENT CAPSULES

One TANK capsule makes 10 litres of working solution, which can be applied onto surfaces with any sustainable spreader, whether that be a microfibre cloth or a biodegradable dry wipe. You can stop using pre-wetted plastic wipes.

DETERGENT

TANK Detergent capsules are filled with a non-enzymatic cleaning concentrate for dilution in 10 litres of water. TANK Detergent is ideal for cleaning and damp dusting.

TANK Detergent leaves surfaces looking clean, shiny and smear-free, and can be stored in TANK and the dosing bottles for up to 30 days.

Many guidelines highlight cleaning as the most important part of a decontamination protocol. Without cleaning, soil and organic matter can create a barrier between the disinfectant and microorganisms, preventing effective disinfection.

WE PROVIDE THE CHEMISTRY YOU ADD THE WATER

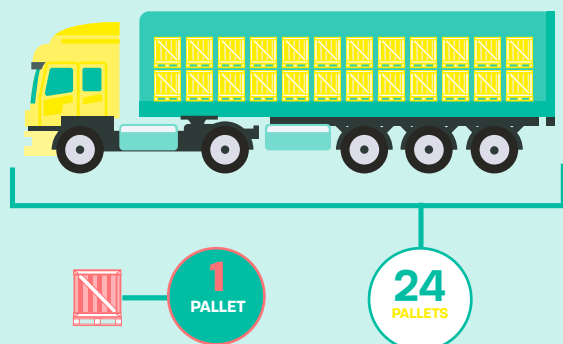

SMALL CAPSULE, BIG IMPACT

One TANK Detergent capsule makes 10 litres of cleaning solution, which is the same as 2,000 generic wipes wetted with 5ml of liquid.

Rather than relying on convenience products which do harm once they are disposed of, TANK uses plastic thoughtfully. The core components are reusable, and all the plastic items within the system are recyclable.

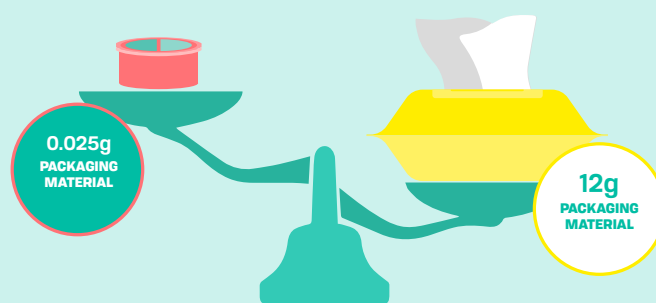

SAVING SPACE

1 PALLET VS 1 LORRY

You only need 1 pallet of TANK capsules to produce the equivalent of 2 million generic pre-wetted wipes.

REDUCING WASTE

0.025g VS 12g

TANK capsules use up to 97% less packaging than pre-wetted plastic wipes.

ANTIMICROBIAL PROTECTION

Biomaster® surface protection is incorporated into each of the TANK labels to reduce bacterial growth. Biomaster is proven to inhibit growth of most types of harmful bacteria, reducing risk of cross-contamination.

EASY TO USE. BURST, FILL & APPLY

WHAT IS THE CACHE COLLECTION?

Cache is a collection of products for the cleaning and sporicidal disinfection of surfaces. The Cache products work together to provide a complete surface disinfection protocol for your hospital.

Our team can offer on-site training, product rollout and audit support for your hospital. Get in touch to find out more.
