## A STORAGE AND DISTRIBUTION SYSTEM POWERED BY DETERGENT CAPSULES

One TANK capsule makes 10 litres of working solution, which can be applied onto surfaces with any sustainable spreader, whether that be a microfibre cloth or a biodegradable dry wipe. You can stop using pre-wetted plastic wipes.

**CLEAN, SHINY  
& SMEAR-FREE  
SURFACES**

# DETERGENT

# TANK

## DETERGENT

TANK Detergent capsules are filled with a non-enzymatic cleaning concentrate for dilution in 10 litres of water. TANK Detergent is ideal for cleaning and damp dusting.

TANK Detergent leaves surfaces looking clean, shiny and smear-free, and can be stored in TANK and the dosing bottles for up to 30 days.

Many guidelines highlight cleaning as the most important part of a decontamination protocol. Without cleaning, soil and organic matter can create a barrier between the disinfectant and microorganisms, preventing effective disinfection.

**WE PROVIDE THE CHEMISTRY YOU ADD THE WATER**

## SMALL CAPSULE, BIG IMPACT

One TANK Detergent capsule makes 10 litres of cleaning solution, which is the same as 2,000 generic wipes wetted with 5ml of liquid.

Rather than relying on convenience products which do harm once they are disposed of, TANK uses plastic thoughtfully. The core components are reusable, and all the plastic items within the system are recyclable.

1 x 200ml  
TANK CAPSULE

=

20 x 500ml BOTTLES  
OF WORKING SOLUTION

1 x 500ml BOTTLE  
OF WORKING SOLUTION

=

100 DOSES  
WITH THE 5ml DOSER

OR

370 DOSES  
WITH THE 1.35ml FOAMER

OR

500 DOSES  
WITH THE 1ml SPRAYER

# EASY TO USE. BURST, FILL & APPLY

## SAVING SPACE

1  
PALLET

24  
PALLETS

### 1 PALLET VS 1 LORRY

You only need 1 pallet of TANK capsules to produce the equivalent of 2 million generic pre-wetted wipes.

## REDUCING WASTE & EMISSIONS

0.025g  
PACKAGING  
MATERIAL

12g  
PACKAGING  
MATERIAL

### 0.025g VS 12g

TANK capsules use up to 97% less packaging than pre-wetted plastic wipes.

### MADE IN THE UK VS MADE IN CHINA

TANK Capsules are filled, sealed, and packed in the UK. To reach NHS Alfreton they only need to travel 134 miles, versus the 12,000 miles required for products manufactured in China.

## ANTIMICROBIAL PROTECTION

Biomaster® surface protection is incorporated into each of the TANK labels to reduce bacterial growth.

Biomaster is proven to inhibit growth of most types of harmful bacteria, reducing risk of cross-contamination.

## ALSO AVAILABLE

### TANK ClO<sub>2</sub> SPORICIDAL DISINFECTANT

TANK can also be powered by ClO<sub>2</sub> Sporicidal Disinfectant capsules.

### JET PRO

JET PRO is a sporicidal chlorine dioxide foam. JET PRO continues to work after application thanks to its unique formulation.

### JET

JET is a sporicidal chlorine dioxide foam. Each pull of the trigger targets surfaces where microbes are a risk.

### FUSE

Designed for use on floors, FUSE combines cleaning action with the sporicidal power of chlorine dioxide.

## WHAT IS THE CACHE COLLECTION?

Cache is a collection of products for the cleaning and sporicidal disinfection of surfaces. The Cache products work together to provide a complete surface disinfection protocol for your hospital.

Our team can offer on-site training, product rollout and audit support for your hospital. Get in touch to find out more.
