

TANK

A STORAGE AND DISTRIBUTION SYSTEM FUELLED BY DETERGENT CAPSULES

1
x5L
H₂O

Fill TANK with ambient tap water until it reaches the 5L mark. Do not use hot water.

2

Take one TANK Detergent capsule and place it face down into the TANK lid. Close the lid to burst the capsule.

3

Open the lid and remove the now empty capsule. This can be rinsed out and sent for recycling.

4
x5L
H₂O

Fill TANK with additional ambient tap water until it reaches the 10L mark. Your TANK Detergent solution is now ready to use.

5

Grab a bottle, flip the tap to open, and fill with working solution. The reusable 500ml bottles can be paired with any of the available applicators.

6

Your working solution can be kept for up to 30 days within TANK or a 500ml bottle. To keep track of this, make a note of the time and date on the TANK lid and any bottles you decant the solution into.

7

Apply the working solution onto a wipe, or directly onto a surface, and wipe.

PRE-USE CHECKS

Some important reminders before starting:

- Use detergents safely.
- Always read the label and product information before use.
- Wear the appropriate personal protective equipment (PPE).
- TANK Detergent is for professional use only.
- Before preparing your solution, make sure your TANK is empty. It should be located on a flat surface, close to a water source in a central location. Remember to check the tap is closed before filling!

Refer to the User Guide for full instructions.

REFILLING YOUR TANK

Before you refill your TANK, rinse it out with tap water.

STORAGE CONDITIONS

TANK Detergent capsules can be kept for 2 years before being used, and should be stored in a cool dry place, out of direct sunlight, between 10°C - 35°C.

SMALL CAPSULE, BIG IMPACT

Single use plastic is rubbish. TANK's reusable plastic components are designed to last, and when they do reach the end of their life they can be recycled. But that's not all. By separating the solution from the wipe, TANK enables you to choose plastic-free wipes and use fewer of them, helping you reduce your plastic waste even further.
